high power

Forme pulite, studiate per offrire massimo comfort all'operatore. Linee eleganti e arrotondate che caratterizzano tutta la gamma S900.

I piani di lavoro, le vasche, le griglie, i pannelli frontali e laterali sono realizzati in acciaio inox AISI 304, le resistenze sono in acciaio inox incoloy, i piani hanno spessore 20/10 e i bruciatori, a singola e doppia corona, garantiscono massima potenza.

Le cucine a induzione, inoltre, sono a bassissimo irraggiamento grazie alle zone di cottura ad area quadrata, che consente di erogare il calore direttamente sul fondo delle pentole senza che questo si disperda.

Finiture a tecnologia laser ad alta precisione - Acciaio inox di prima qualità - Dettagli curati - Alta efficienza energetica

S900

Minimal forms designed to offer the maximum comfort for the operator. Elegant and rounded lines characterize the whole S900 range. The working tops, the tanks, the grids, the front and side panels are all made of AISI 304 stainless steel, the resistances are made of Incoloy stainless steel, the tops are 20/10 thick and the single and double ring burners guarantee the highest power. Moreover, the induction stoves have a very low irradiation thanks to the square cooking zones, which irradiate the heat directly on the bottom of the pans without losing heat. High precision laser finishing – First quality stainless steel – Painstaking details – high power efficiency

Des formes épurées, conçues pour offrir le confort maximal à l'opérateur. Des lignes élégantes et arrondies qui caractérisent toute la gamme S900. Les plans de travail, les cuves, les grilles, les panneaux frontaux et latéraux sont réalisés en acier inoxydable AISI 304, les résistances sont en acier inoxydable incoloy, les plans ont une épaisseur de 20/10 et les brûleurs, à couronne simple ou double, garantissent une puissance maximale.

Les cuisinières à induction sont à rayonnement très bas grâce aux zones de cuisson de forme carrée, qui permettent de distribuer la chaleur directement sur le fond des casseroles sans aucune dispersion.

Finitions à technologie laser haute précision – Acier inox de première qualité – Détails soignés – Haute efficacité énergétique

Reine Formen, die zur Gewährleistung des höchstmöglichen Benutzerkomforts entwickelt wurden. Die eleganten, abgerundeten Linien charakterisieren die gesamte Modellserie S900. Die Arbeitsflächen, Wannen, Grillroste, Vorder- und Seitenwände sind aus rostfreiem Stahl AISI 304 gefertigt, die Heizwiderstände aus rostfreiem Incoloy-Stahl, die Platten besitzen eine Stärke von 20/10 und die Brenner mit Einzel- oder Doppelring garantieren maximale Leistung.

Die Induktionsherde zeichnen sich darüber hinaus dank der quadratischen Kochzonen, die eine direkte, verlustfreie Abgabe der Wärme an den Topfboden ermöglichen, durch eine besonders niedrige Wärmeabstrahlung aus.

Ausführungen mit Hochpräzisions-Lasertechnologie – Hochqualitativer rostfreier Stahl – Sorgfältige Detailausführungen – Hohe Energieeffizienz

# S700

**BERTO'S®**  
the best catering equipment

Nella nuova serie S700 l'attenzione alla praticità e all'estetica emerge in ogni dettaglio: ampie superfici e piani lisci agevolano l'operatività, gli angoli arrotondati, il design ricercato delle griglie e la parte laterale a mezza luna aumentano l'eleganza, le finiture interne sono studiate per favorire l'igiene, l'ergonomia delle manopole e i comandi digitali inclinati ne facilitano l'utilizzo. Una linea che spicca per una qualità imbattibile anche nei materiali: i piani di lavoro, le vasche, le griglie, i pannelli frontali e laterali sono realizzati in acciaio inox AISI 304 e le resistenze sono in acciaio inox incoloy; i piani hanno spessore 20/10 e i bruciatori, a singola e doppia corona, garantiscono massima potenza.

S700

In the new S700 series, the special attention paid to practicality and design is shown in each detail: large surfaces and smooth tops for easier work, rounded edges, sophisticated design for the grills and crescent shaped side give a more elegant air, and the interior finishes are studied to improve hygiene, with ergonomic knobs and inclined digital controls for easier use. A line that stands out for the unbeatable quality of the materials used as well: worktops, trays, grills, front and side panels are all in AISI 304 stainless steel and Incoloy stainless steel elements. The tops are 20/10 thick and the single and double crown burners guarantee the exceptional power.

Dans la nouvelle série S700, l'attention à la praticité et à l'esthétique se distingue dans tous les détails : de grandes surfaces et des plans lisses qui facilitent le travail, les angles arrondis, le design recherché des grilles et la partie latérale en forme de croissant augmentent l'élegance, les finitions internes sont conçues pour faciliter l'hygiène, l'ergonomie des poignées et les commandes numériques inclinées facilitent l'utilisation. Une ligne caractérisée par la qualité incomparable des matériaux : les plans de travail, les cuves, les grilles, les panneaux frontaux et latéraux sont réalisés en acier inoxydable AISI 304 et les résistances sont en acier inoxydable incoloy ; les plans ont une épaisseur de 20/10 et les brûleurs, à couronne simple ou double, garantissent une puissance maximale.

Bei der neuen Serie S700 kommt die Aufmerksamkeit auf praktische und ästhetische Aspekte in allen Details zum Ausdruck: große Oberflächen und glatte Arbeitsflächen erleichtern die Arbeit, die abgerundeten Kanten, das erlesene Design der Roste und das halbmondförmige Seitenteil unterstreichen die Eleganz, die Innenausführungen sind zur Verbesserung der Hygiene konzipiert und die ergonomischen Drehschalter und die geneigten digitalen Bedienelemente sind besonders bedienerfreundlich. Eine Linie, die auch bei den Materialien durch ihre unschlagbare Qualität hervorsticht: die Arbeitsflächen, Wannen, Roste, Vorder- und Seitenwände sind aus rostfreiem Edelstahl AISI 304 gefertigt, die Heizkörper aus rostfreiem Incoloy-Stahl. Die Platten besitzen eine Stärke von 20/10 und die Einzel- und Doppelring-Brenner garantieren maximale Leistung.
